

Singly Linked Lists & Doubly Linked Lists

Singly Linked List

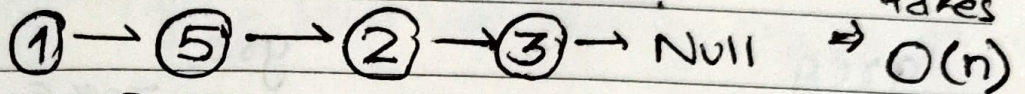

Linked list node

→ This don't have indices

```

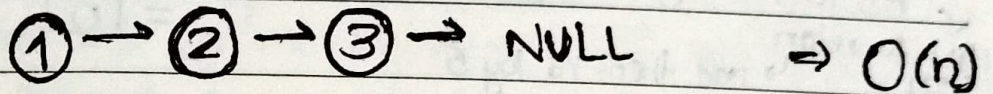

class Node:
    Node.value =
    Node.next = B
    (if we're at A)
  
```

Add node at position 2 value 5

Del node at position 2

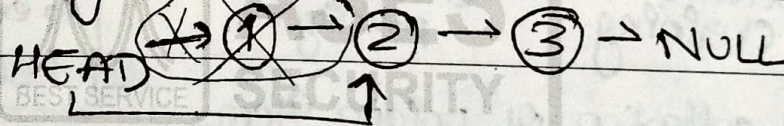

• traverse

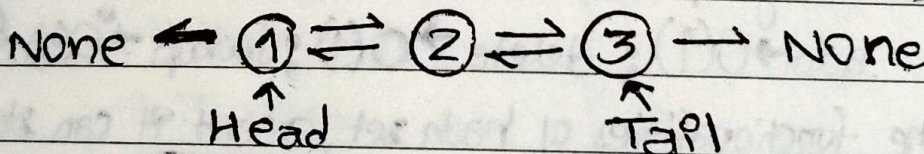

Access a node ⇒ $O(n)$

Deletion/insertion at beginning ⇒ $O(1)$

Insertion

Doubly Linked Lists

```

class Node:
    Node.value =
    Node.next =
    Node.prev =
  
```
